

RESPOND TO ALERTS. DON'T REACT TO CATASTROPHES.

SATELLITE REMOTE MONITORING WITH WATCHDOG ST

Instead of reacting to a down well due to high tank level, compressor malfunctions, or electricity outages, respond to automated alerts in the palm of your hand before a catastrophe occurs. Easy to install, Watchdog's 4 device setpoints provide alerts via one-way satellite — not unreliable wifi — communication via text, email or phone call. Receive critical alerts on equipment, no matter how remote, to reduce equipment downtime and prevent disruptions to well production.

Envision a new way with remote monitoring:

1. Gas well #74 compressor malfunctions and shuts off.
2. Watchdog ST connected to the Murphy switch gauge is triggered and sends an alert via satellite.
3. The gauger receives the alert as a text, email or phone call.
4. Gauger lessens well downtime by making needed repairs.

WATCHDOG BY THE NUMBERS:

- 4x Dry Contact (0 voltage) Inputs
- 1+ Year Battery Life
- 1x1 amp, 30 VDC Output
- 1-3.6v/C + 4-AAA Lithium Batteries
- 3 Second, 1, 5, 10 Minute Delay Options
- 15 Alert Recipients

WATCHDOG INCLUDES:

Custom Input Board
Weatherproof Enclosure
SmartOneC Transmitter

Lithium C Cell Battery
AAA Alkaline Batteries (4)

WATCHDOG ST

CONSIDER THESE APPLICATIONS:

- **Natural Gas**
 - Soap stick launcher functioning
 - Gas well production facilities monitoring
- **Rural Water Districts**
 - Water tank levels
 - Tank pressure levels
- **Oil Production**
 - Compressor on or off
 - Pipeline pressure too high
- **Agriculture**
 - Low stock tank level
 - Propane tank level monitoring
 - Irrigation pump down

Stop losing money due to excessive downtimes or hazardous consequences. Be in the know 24/7/365. Give us a call today and take back the power to be a successful production operator.

In the meantime, check “5 Critical Applications for Remote Monitoring: Be Aware When You’re Not There.”

Sentry Technologies provides remote satellite monitoring of your critical systems. Customizable, easy-to-use, and backed by superior service with decades of hands-on production field experience.
